

Do You Need a Family Doctor?

Do you need someone who cares about you? Who knows you and what you need? Who knows all your history and weaknesses, and can quickly handle your specific illnesses? An expert doctor in caring and compassion? And maybe an expert in motivating you?

Is it possible in this day and age, specialists are concerned about their own areas? Do you need someone who sees the whole picture and treats accordingly, as well as a specific part?

Would it be nice to have someone to direct you appropriately, when and if needed?

A Family Doctor does all this. A Family Doctor knows you personally.

Holzer Health Systems has 30 Family Doctors to help you... And any one of them would be happy to meet you and take care of you in the best possible way.

A Family Doctor will give you an annual physical exam, including basic lab tests to check for diabetes, kidney function, blood pressure and heart health, liver tests, cholesterol, blood electrolytes, and others. Coverage for an annual exam is part of Medicare, Affordable Care Act, and many private insurances.

On physical exam, signs of other diseases may be seen, and at a very early time. Almost every disease is much more easily treated when discovered early.

When you have a Family Doctor, you can be seen and taken care of more quickly, as he/she knows your past medical problems and history. He/she is your doctor, and you are not just a number.

Come, get established with your Family Doctor, and be taken care of on a lifelong basis. You will experience better health, excellent advice, and quick attention to any diseases that may affect you.

Call Holzer Health Services at 1-855-4HOLZER (1-855-446-5937), and ask for your Family Doctor.
